V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims		YES
	Claims	1-9	NO
Inventive step (IS)	Claims		YES
	Claims	1-9	NO
Industrial applicability (IA)	Claims	1-9	YES
	Claims		NO

2. Citations and explanations

1. Reference is made to the following document:

D1: US-A-5 840 372.

- 2.1. Document D1, which is regarded as the closest prior art, discloses (see column 1, lines 7-30, column 2, lines 8 and 22-41; and Examples A and B) a method for producing a multilayer protective and/or decorative coating on a substrate, a pigmented aqueous basecoat containing a polyacrylate resin being applied to a substrate. The polyacrylate resin can be obtained by radically polymerising a mixture comprising monomer (a) (furfuryl acrylate and/or furfuryl methacrylate and, for example, hydroxyalkyl esters of acrylic or methacrylic acid) and monomer (b) (for example acrylonitrile, methacrylonitrile, styrene, vinyltoluene...).

A polymer film of the basecoat is first applied to the substrate, a clearcoat is then applied and finally both coating layers are baked together. The coating is used, in particular, to coat motor vehicles.

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

1. Claims 1-3 are unclear, since monomers (a) and (b) can be the same. These claims therefore do not meet the requirements of PCT Article 6.
2. It is not clear whether Claims 3-7 are product or method claims. These claims therefore do not meet the requirements of PCT Article 6.
